DIPANKAR BASAK

Senior DevOps & Platform Engineer

Bengaluru, Karnataka, India | +91-8597754228 | dbasak2013@gmail.com | linkedin.com/in/basakdipankar | github.com/basakdipankar

SUMMARY

Senior DevOps and Platform Engineer with **9 years** of experience building resilient Internal Developer Platforms (IDPs), automated multi-cloud infrastructure, and enterprise CI/CD pipelines at scale. At SAP Labs India, designed and operated a self-service Python/Jenkins IDP for SAP BTP ABAP Environment — a declarative JSON-driven engine provisioning **350+ systems weekly** across AWS, Azure, GCP, and SAP Converged Cloud for **15+ engineering teams** with zero manual handoff. Deep expertise in developer experience (DevEx), golden path CI/CD, Infrastructure as Code (IaC), telemetry observability, and AIOps (RAG, LangChain, MCP). Proven track record delivering **35–60% efficiency gains** and **20–50% error/incident reductions** across multi-cloud production environments.

CORE COMPETENCIES

- **Developer Platform & DevEx:** Internal Developer Platforms (IDP), Self-Service Automation, Golden Path Tooling, Platform-as-a-Product, Cognitive Load Reduction, DevEx
- **CI/CD, GitOps & Automation:** Jenkins (Groovy Shared Libraries, Declarative Pipelines), GitHub Actions, Azure DevOps, ArgoCD, Python, Bash, GitOps, DevSecOps (SonarQube, Trivy), JFrog Artifactory
- **Cloud & Kubernetes:** Kubernetes (AKS, EKS, KOPS), Helm, Docker, SAP BTP, Cloud Foundry, AWS (EC2, S3, IAM), Azure (VNet, Blob Storage), GCP, SAP Converged Cloud
- **Infrastructure as Code & Reliability:** Terraform, Ansible, Multi-cloud Provisioning, Blue-Green Deployments, Automated Rollback, Configuration Drift Prevention
- **Observability & AIOps:** Prometheus, Grafana, InfluxDB, Telemetry Pipelines, Proactive Alerting, Generative AI (RAG, LangChain, ChromaDB), Model Context Protocol (MCP), AIOps

PROFESSIONAL EXPERIENCE

SAP Labs India Pvt. Ltd. — Senior DevOps & Platform Engineer | Feb 2022 – Present

- **Internal Developer Platform (IDP):** Architected a self-service, declarative JSON-driven IDP using Python and Jenkins for SAP BTP ABAP Environment — provisioning **350+ systems weekly** across AWS, Azure, GCP, and SAP Converged Cloud for **15+ engineering teams** with zero manual handoff.
- **Self-Service Multi-Cloud IaC:** Integrated Terraform into the IDP to provision infrastructure via versioned golden path templates on AWS (EC2, S3, IAM), Azure (VNet, Storage), GCP, and SAP Converged Cloud — eliminating configuration drift across multi-cloud environments.
- **Golden Path CI/CD:** Engineered an enterprise Jenkins Shared Library in Groovy — standardizing pipeline architectures across **15+ teams**, eliminating redundant code, and reducing pipeline setup time by **60%**.
- **Ephemeral Build Infrastructure:** Containerized ephemeral Jenkins agents using Docker and versioned runners via JFrog Artifactory for Terraform and SAP BTP CLI — enabling isolated, reproducible build environments and reducing compute resource consumption by **35%**.
- **Deployment Safety & Blue-Green:** Designed event-driven GitHub webhook pipelines with automated blue-green deployment strategies on Cloud Foundry and Kubernetes (AKS) — reducing deployment execution time by **40%** and cutting manual configuration errors by **50%**.
- **Observability & Telemetry:** Built automated telemetry ingestion pipelines in Python streaming pipeline execution signals into InfluxDB and Grafana with proactive alerting rules — detecting degraded deployments before production impact and reducing post-release incidents by **20%**.
- **AIOps & Root Cause Analysis:** Delivered a Generative AI incident analysis engine using RAG, LangChain, and ChromaDB vector database — enabling semantic search over historical postmortems and reducing incident analysis time by **30%**.
- **AI-Driven Operational Reporting:** Integrated LLMs with InfluxDB via Model Context Protocol (MCP) server architecture — automating natural language telemetry queries and generating weekly release quality reports for engineering leads.
- **Developer Enablement:** Led enterprise enablement workshops integrating AI coding tools (GitHub Copilot, Claude Code, Cline) into developer workflows across **15+ teams** — accelerating engineering velocity and reducing daily developer toil.

Tata Consultancy Services (TCS) — DevOps / Platform Engineer | Oct 2017 – Jan 2022

- **AKS Cloud Migration:** Led migration of legacy on-premises workloads to AKS microservices architecture on Azure (VNet, Storage, Entra ID) — reducing infrastructure operating costs by **50%** and improving deployment rollback capabilities.
- **CI/CD & Security Standards:** Built end-to-end Azure DevOps pipelines integrated with SonarQube for automated SAST and security quality gates — boosting delivery frequency by **30%** across production releases.
- **Infrastructure as Code (Azure):** Automated Azure cloud provisioning using modular Terraform with remote state locking in Azure Blob Storage — ensuring consistent, drift-free infrastructure across dev, staging, and production environments.
- **Kubernetes Lifecycle (AWS):** Automated HA Kubernetes cluster lifecycle on AWS (EC2, KOPS) using Ansible configuration playbooks — accelerating feature time-to-market by **30%**.
- **Container Standardization:** Containerized Java/Node.js microservices using Docker multi-stage builds published to JFrog Artifactory — reducing container image footprint by **35%** and standardizing container delivery patterns across AKS.
- **Observability Foundation:** Deployed Prometheus and Grafana alerting stacks across production Kubernetes microservices — establishing proactive incident monitoring and operational visibility.

EDUCATION & CERTIFICATIONS

- **B.Tech in Computer Science and Engineering** | Kalyani Government Engineering College, 2013 – 2017
- **Certified Kubernetes Administrator (CKA)** | Linux Foundation, 2025
- **Microsoft Certified: Azure DevOps Engineer Expert** | Microsoft, 2024
- **Microsoft Certified: Azure Administrator Associate** | Microsoft, 2024
- **Oracle Cloud Infrastructure (OCI) Certified Generative AI Professional** | Oracle, 2024
- **Generative AI at SAP** | OpenSAP, 2024
- **Terraform Associate: HashiCorp Certified** | HashiCorp / KodeKloud, 2023
